

Oblig 1: Name-Quiz app (WholsWho app)

Built with API 28

General structure:

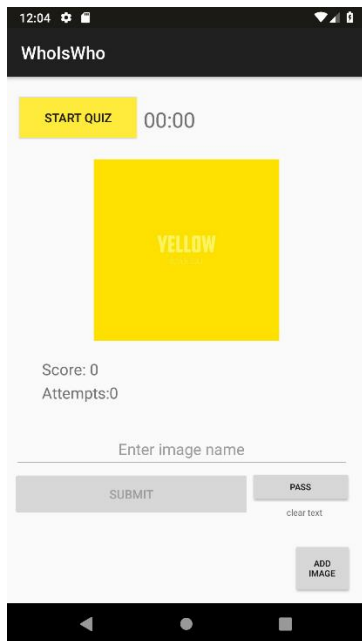

1, Start app , first showing a splash log, disappear after 3 sec

2, Start quiz with click button “START QUIZE”,
Countdown timer will be started at the same time (60 seconds).

❖ Quiz implemented with Countdown clock,

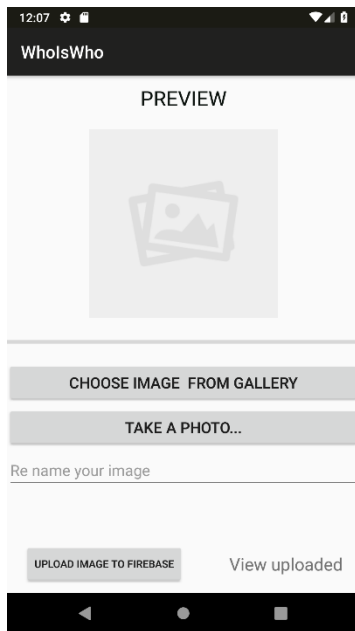

- User input will be validated
- User can restart, pause, plus user can get total score and attempts in the end.

3, Add image Activity

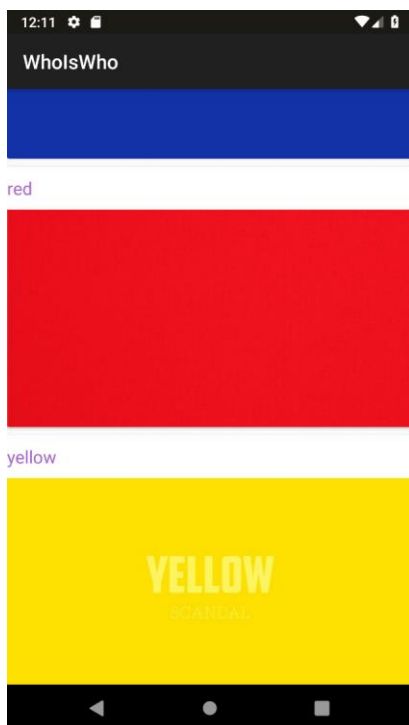

User can add images from Mobil gallery or by using capture a new image with Camera

- Preview new selected or new added image are available
- User can rename image before upload to firebase storage.

4. Real-time downloading all images stored from Firebase and showed in a recycler view, image and its name.

(Delete image and edit image name are not implemented. But they will be added in the next assignment

The bottom image is the latest uploaded.
